

## Online Direct (Pty) Ltd.

### COMPANY OVERVIEW

Headquartered in Johannesburg, Online Direct was founded in 2004 at the inception of networked communications. During the past few years Online Direct have established themselves as a leading information, technology, and communications service provider of converged business solutions.

The business has successfully grown into this niche market by offering leading technologies, state of the art data centres and world class service. In just seven years, we are now a comprehensive and diverse solutions provider, offering a unique range of unified data and communication products and services to the corporate and small business market within Southern Africa.

Our comprehensive and diverse products are seamlessly delivered from tier one next generation networks, from wireless to wired connectivity, compliant email management solutions, and cost effective voice services suited to our client's needs. We integrate, design, and implement all your communication requirements with multiple service level deliverables, to maintain and manage mission critical services at all times.

Being a personalised business, we pride ourselves on our reputation and commitment to delivering cost effective, reliable and efficient solutions. We comprehensively analyse our clients IT infrastructure and architecture, before delivering the right solutions for your business.
